

# CONNECT to the POWER

Save up to 50% on a new IsoVu probe with this promotion.

Up to  
50% Off

## Up to 50% Off

Eliminate common mode interference with IsoVu™, ensuring accurate and reliable data even in the most demanding environments.

### IsoVu™ Isolated Voltage Probes

Uncover the fast, floating signals that your non-isolated probes are hiding. IsoVu Probe Technology virtually eliminates common mode interference using optical isolation. This delivers accurate differential measurements on reference voltages slewing  $\pm 60\text{kV}$  at  $100\text{V/ns}$  or faster. And with our IsoVu Generation 2 design, you get all the benefits of IsoVu technology at 1/5 of the size.

#### Bundle up and Save

Get up to 50% off the second-generation IsoVu Isolated Differential Voltage Probes (TIVP) when you purchase two or more probes in a bundle on the same P.O.

#### Enhance efficiency, flexibility, and comprehensiveness with multiple probes.

- **Multiple Probing Points:** Collect data from multiple sources simultaneously for a comprehensive system analysis.
- **Faster Test Setups:** Cut testing time by gathering data simultaneously for quicker troubleshooting.
- **Flexible Setups:** Adapt to different testing scenarios for customized tests.
- **Concurrent Testing:** Test multiple nodes or devices simultaneously for an efficient system assessment.

Probe	Discount
TIVP02	50%
TIVP05	35%
TIVP1	35%
