

Remotely share test and measurement data

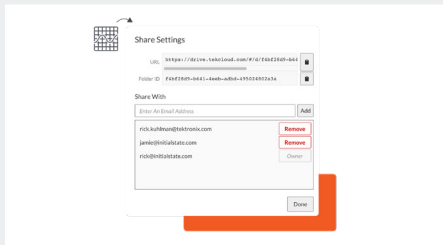

TekDrive Collaborative Data Workspace

Staying productive while working remotely is essential now more than ever. And collaboration is the key to success. Let TekDrive transform your oscilloscope into the industry's first remotely collaborative instrument.

TekDrive is the first file sharing platform for test and measurement data. It provides an oscilloscope-to-cloud software solution for instant data sharing and recall on an oscilloscope, PC, phone, or tablet. It provides a secure location to store, share, and collaborate on waveform and analysis data. Visualize data on a browser and easily collaborate on projects with colleagues, classmates, or professors.

Start your free 30-day trial at tekcloud.com/tekdrive.

Collaborate seamlessly

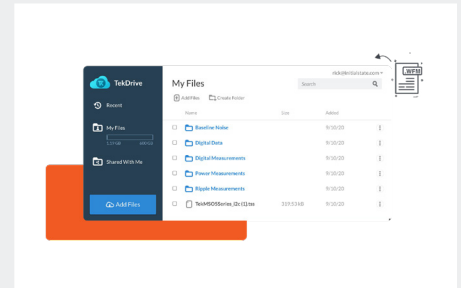

Easily share data with colleagues and team members or between lab peers, students, and professors anywhere in the world with the confidence that your data is protected by industry-leading security protocols.

Manage data in one place

Analyze and manage your files from any device with a browser, including smartphones and tablets. With TekDrive, engineers and teams can store, search, filter, sort, manage, and securely share files and data of any format, including interactive visualization support for Tektronix oscilloscope files (eg: *.wfm, *.isf, *.tss, and *.csv).

Securely access data from anywhere

TekDrive features a secure and sophisticated infrastructure to ensure the confidentiality, integrity, and availability of your data.

“Being able to share data directly from instruments via TekDrive is a breakthrough for engineering teams in the commercial and academic space to learn and innovate efficiently.”

Siddharth Deliwala, Director of Laboratory Programs at University of Pennsylvania

TekDrive Collaborative Data Workspace

Remotely share test and measurement data

Save and recall directly on instruments

Once TekDrive is mounted on an oscilloscope or other supported instrument, engineers can interact with files, folders, data in the same manner as any other drive – except backed by the power of instant sharing and seamless accessibility.

Instrument integrations

Use TekDrive directly on the following instruments:

- 5 Series MSO Mixed Signal Oscilloscope
- 5 Series MSO Low Profile
- 6 Series MSO Mixed Signal Oscilloscope
- 6 Series Low Profile Digitizer
- 6 Series B MSO Mixed Signal Oscilloscope
- 4 Series MSO Mixed Signal Oscilloscope

Software integrations

- Interact with TekDrive through a browser and TekScope
- Any modern browser on any device including Edge, Chrome, Firefox, and Safari
- TekScope PC Analysis Software

APIs and SDKs

TekDrive offers a well-documented REST API that can be used to integrate data storage and transfer from any connected system. The API is developer, scripter, and automation friendly by offering simple interfaces based on HTTP REST.

- **Python** – Python Library SDK for TekDrive
- **LabVIEW** – Example VIs that upload, download, and show directory tree in LabVIEW
- **.NET** – Library for integrating TekDrive data with .NET
- **MATLAB** – Code Examples for uploading and downloading data written in MATLAB
